CERTIFICATIONS

- Fundamentals of Database (SQL)
- Master Data Management for beginners from TCS ION.
- Introduction to Artificial Intelligence.
- Communication Skills from TCS ION.

EDUCATION

Bachelor of Science
2019 - 2023
Pondicherry University

PROFILE SUMMARY

Detail-oriented and committed to delivering high-quality code that meets project requirements and exceeds client expectations. Passionate about learning and adapting to new technologies to stay ahead in the ever-evolving field of software development.

PROJECTS Bus Ticket Reservation System - Built using **Java** and **MySQL**

The Bus Ticket Reservation System is a comprehensive **Java**- Console based application that allows users to easily book bus tickets online. The system provides a **user-friendly interface** for passengers to browse available buses, select seats, and make reservations. The backend of the system is powered by a MySQL database, ensuring efficient and secure data storage.

Key Features;

- User registration and Authentication.
- Bus Information.
- Seat Selection.
- Reservation and confirmation
- Booking history
- Database Integration.

Technologies Used:

- Java for the Console based application logic.
- MySQL for the backend database management.
- JDBC for connecting Java application with MySQL database.
- Integrated development environment (IDE) such as Eclipse
